BEGINNER FRONTEND – DAY 7

HTML • CSS • JavaScript | Learning Material & Task

Hi everyone!

Today we will continue learning HTML, CSS, and JavaScript. We will focus on JavaScript events, DOM manipulation, and creating interactive web pages.

1. TODAY'S LEARNING

HTML – Structure

- Forms and input fields
- Buttons and containers
- Using IDs and classes

CSS – Styling

- Flexbox layout
- Card design and hover effects
- Colors, borders, margin, and padding
- Basic responsive design

JavaScript – Functionality

- Functions and event handling
- `addEventListener()`
- DOM manipulation
- `getElementById()` and `querySelector()`
- `innerText` and `innerHTML`
- `classList.add()` and `classList.remove()`
- Basic input validation

2. EXAMPLE – SHOW/HIDE PASSWORD

Create a password input field and a button that allows users to show or hide their password.

Concepts: HTML input, CSS styling, JavaScript events, and DOM manipulation. This example is for learning purposes only.

3. DAY 7 TASK – INTERACTIVE TO-DO LIST

Create a To-Do List Application using HTML, CSS, and JavaScript.

HTML Requirements

- Add a heading: “My To-Do List”
- Add an input field to enter a task
- Add an “Add Task” button
- Add a section to display tasks

CSS Requirements

- Design a clean and attractive interface
- Style the input field and buttons
- Add spacing, colors, and borders

- Add hover effects
- Make the page responsive on mobile screens

JavaScript Requirements

- Add a new task when the user clicks “Add Task”
- Allow users to mark tasks as completed
- Allow users to delete tasks
- Display a message if the input field is empty
- Clear the input field after adding a task

4. OPTIONAL CHALLENGE

- Allow users to add tasks by pressing the Enter key
- Display the total number of tasks
- Use different styles for completed and pending tasks

LEARNING GOAL

Understand how HTML, CSS, and JavaScript work together to build an interactive application.

Keep learning, keep building, and keep improving!
